Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 1-3, 5-9, 15-18 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. In claims 1, the term "wherein the first and second continuous flowpaths each include a filtration means and", constituted a new matter; although the first and second flow paths are connected to the filtration means, the flow paths, each individually do not include a filtration means. Figure drawings do not support that limitations.

2. The amendment filed 132 August 2003, is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: "wherein the first and second continuous flowpaths each include a filtration means and", added to page 1, line 16.

Applicant is required to cancel the new matter in the reply to this Office Action.

3. Rejection under 112 in paper No. 13 (mailed on 2/13/2003) are maintained.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-3, 5-7, 9-10, 12-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hartmann (5,693,229). This rejection has been discussed in paper No. 13 (of 02/13/03), and is maintained.

Allowable Subject Matter

5. Claims 8, and 11 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, and second paragraphs, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

6. The following is a statement of reasons for the indication of allowable subject matter: the apparatus arranged with the bypass (elements 94 and 98, fig. 3) of the present invention is not disclosed or suggested in the prior art of record.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Response to Arguments

8. Applicant's arguments filed 8/13/03 have been fully considered but they are not persuasive. The claims have not been properly amended to include a filter in the flow path, which flow path is formed by the feed conduits, the filter unit (s), or filters and the permeate and retentate discharge conduits, and its recirculation back to the feed conduits or feed conduits bypasses. Rejection under 112, as discussed in paragraph 1 of the office action will be withdrawn if the claims are amended to include the filter as part of the fluid circuit, and as essential element of the system. Additional claims will be considered by the Examiners after amended to provide all the elements of the system as whole, and to overcome new matter. The rejection based on Hartman is considered proper. Hartman teaches flowpath (feed and outlet conduits for permeate and retentate connected to a filter in a filtration circuit, and its use.
